
CUSTOM PROGRAMMING

If your company needs to modify or enhance software applications, SCH has a highly trained staff available to assist you.

NETWORK ADMINISTRATION

SCH offers assistance in the administration of numerous types of networks and systems, ranging from peer-to-peer to client/server to VPN and remote access.

BUSINESS CONTINUITY

DISASTER RECOVERY

Unplanned as well as planned downtime can impact companies by bringing operations to a halt. SCH has solutions to ensure continuous operations and disaster recovery. Our consultants will meet with your team to plan, design, execute, and launch a business continuity and disaster recovery plan.

SYSTEM AND DATA SECURITY

SCH can help ensure system and data security from both external and internal intrusion. Have our security team perform an analysis of your system design and implement solutions necessary to protect your system and data.

Software

◆ Lakeview Technology

Software specializing in **High Availability, Disaster Recovery, Clustering and Data Replication**. Solutions to enhance your information enterprise by making business information highly available and accessible to decision makers. These solutions support any application in OS/400®, Windows®, UNIX® and Linux® operating environments.

◆ PowerTech Group

Security Solutions to extend your i5 security protection by detecting and auditing both internal and external intrusions with state-of-the-art real-time intrusion detection, access control, policy management and central administration capabilities.

◆ Enterprise Solutions

Baan, VAI, Infinium, Harris Data, NGS

Application solutions to fit your infrastructure for management of financial, distribution, warehouse, purchasing, sales analysis, retail, metal, automatic data collection, CRM, and business intelligence.

◆ SCH Suite (Tax Assessment Software):

SCH Personal is designed for the maintaining, reporting, and sharing information pertaining to properties. *SCH Assessment* allows data management to maintain and edit master records within the property tax assessment system. *SCH Mobile* maintains, reports, and allows sharing information pertaining to a mobile property. *SCH Menu* is a flexible package that allows users to set-up and maintain all the menus used to perform their job and the ability to add other Vendor's software as well as system commands to the Menu.

Consulting
