

The Wiresoft Leasing Program

Wiresoft offers a lease/purchase option for any customers who wish to purchase a Sentry SMB (Small to Medium Business) unit or a Sentry SME (Small to Medium Enterprise) unit.

What it is:

Customers who want to purchase an SMB (either the stand alone unit or the 1U rack mountable unit) or an SME or any of our other services are eligible for financing such a purchase. We only offer this program on a 36 month term, and we require that the customer also purchase the additional year warranty on the hardware, since our standard warranty for the hardware is two years. This period for payments now covers both the three year subscription period for the entire support package, etc. and a hardware warranty for the same length of time.

How it works:

There is a lease application form accompanying this document. The customer needs to fill it out and then provide it to Wiresoft by fax. It will be reviewed and a decision made within 5 working days. In addition to completely filling out the forms attached, the customer must also include a page with a copy of their driver's license for identification purposes.

Payments:

Once the lease application is approved, the customer executing the lease will be provided with an invoice for the first and last month's payment and a \$100 processing fee. They will also be sent information about how to make regular monthly payments to the financing company working with Wiresoft.

Cancellation Policy

Like a direct purchase, Wiresoft provides a full hardware warranty for two years and there is an option on our product list to extend the warranty for extra periods of time. However, there is no cancellation policy after the 30 day money back guarantee expires or after the 14 day Try & Buy promotion period expires.
