Sentry SMB 1U Rack Mountable

Sentry Enterprise (SME)

Why do I need Gateway Network Security Protection?

I have desktop anti-virus protection.

- 30% of ALL companies have had a virus
- 90% of those had anti-virus engine running
- Speed of infection is “lightning quick”
- Slammer Virus: infected 90% of vulnerable hosts around the world in 10 minutes
- No time for “patch & fix” approach
- Small businesses (SMB) have large business needs but fewer resources

“We figured the one virus we caught before we installed the Sentry cost us \$10,000, So every time the Sentry stops just one virus we have saved money and increased productivity”

Victor Timmons – Tiz Doors IT Director

Why do I need Gateway Security Protection?

- Business continuation is your top priority
- Spam clogs your network - reducing productivity – costing you money!
- It's the law - Compliances such as SOX, HIPAA, GLB, Specter Leahy, etc.
- Need multiple layers of protection
- It is affordable and fits your business needs!

"We figured the Sentry stops about 3,000 spam emails a week. This was a huge clog in our artery until we installed the Sentry"
Stephen Peterson – Andersen Hunter Attorneys

Simplify Your Network with a Single Platform!

Sentry all in one!

VS

The diagram compares a single Sentry appliance (left) with a stack of four separate appliances (right): FIREWALL, VPN, ANTI_VIRUS, and SPAM Filter. The Sentry appliance is a black, rectangular device with a fan grille on top and the wiresoft logo on the front. The separate appliances are stacked vertically, each with its own label and a small image of the device.

Eliminate the **complexity** created by stand alone appliances!

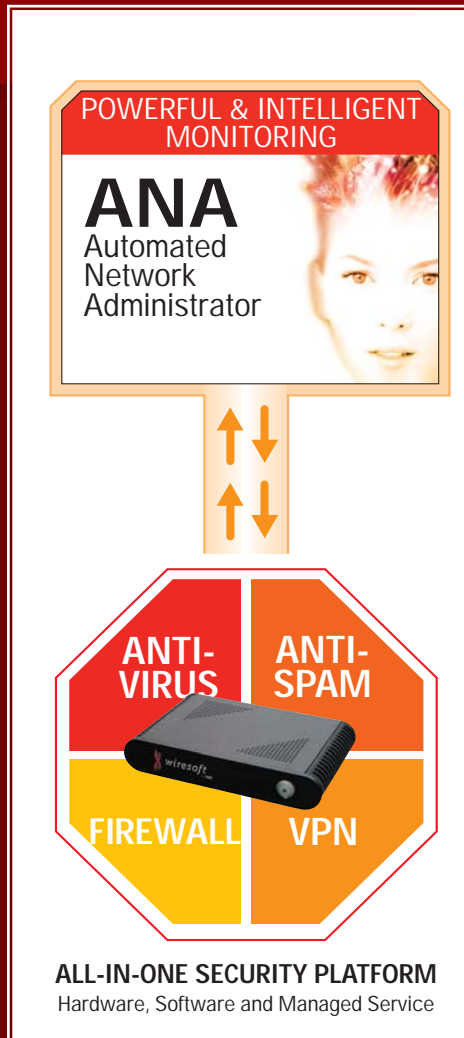

AND, enjoy the benefits of 24/7/365 monitoring with a platform that can be expanded for new products and services

Who needs the Sentry Gateway Security Solution?

Any business that:

- Has 1-50 Users w/outourced IT Expertise
- Has Limited Resources
- Has a Limited Budget
- Cannot afford "downtime"
- Needs network to operate at optimum performance
- Wants to protect their intellectual property

"It is very easy to get into and to add people to the system"
Sandy Mullin, City of Aberdeen

Why is Perimeter Protection Important?

- **Intelligent Network Security**
 - Ensures business continuity
 - Provides cost savings (Positive ROI)
- **Multifunctional:**
 - Firewall, Anti-Virus, SPAMWALL, Remote Access (VPN), Intrusion Protection
- **24 hour monitoring & updating**
- **Cost effective - no seat licenses**
- **Free version upgrades**
- **Expandable for other products**
 - Email archiving and retrieving
 - Anti-virus for Instant Messaging
 - Advanced content filtering & more

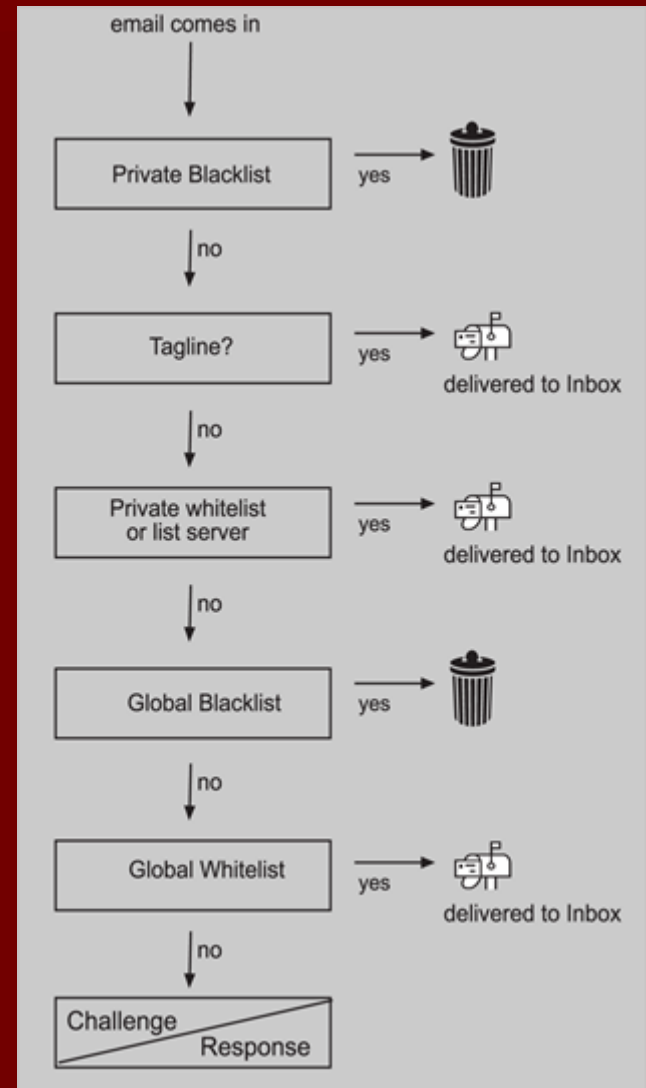

How Wiresoft Spam Protection Works

Three methods of handling spam:

- Challenge/response only
 - Challenge/response with filtering
 - Filtering only
- Supports POP3 and SMTP
 - Custom Bayesian engine and self learning

Challenge/Response – How it Works

1. Email arrives
2. Check performed for “white list” or “black list” (personal or global)
3. Whitelist email is delivered
4. Non whitelist email sender asked to verify their email address.
5. Once verified via return email, they will be added to your whitelist.
6. Outgoing email to new recipients can be automatically added to whitelist

- Blocks 100% of spam messages by employing an advanced challenge/response system to thwart automated messages
- Processes 3.6 Mbps of aggregate throughput while simultaneously scanning for viruses, worms, Trojans and other malicious traffic
- Yields 24 Mbps of aggregate throughput over a VPN connection between two locations while handling 1,400-byte packets
- Supports aggregate throughput of 171 Mbps while actively screening traffic in firewall mode
- Demonstrates resiliency to service outages by utilizing a failover port to cut over to backup DSL, cable or dial-up connections

A hands-on examination of Wiresoft Net, Inc.'s Sentry Security Platform shows that the bundled solution for small-to-medium businesses (SMBs) delivers on the promise of business continuity, increased productivity, self-maintaining reliability, and expandability in a single solution.

The dilemma that SMBs face today is that the IT market abounds with supplier after supplier that offer point solutions for security. Yet these are

The Tolly Group also verified the Wiresoft solution's VPN capabilities, including Point-to-Point Tunneling Protocol (PPTP) and IPSec support for VPN connections. Among the VPN findings, tests show that Sentry Security Platform sustains up to 24 Mbps of zero-loss throughput across a single-tunnel configuration supporting IPSec and 1,400-byte packets. Further, firewall testing revealed that Sentry Security Platform delivers 171 Mbps of

Tests reveal that Wiresoft Security Platform hits the mark for SMBs
